

❑ AstroVault CRM

A full-stack CRM application built for astrologers and consultation-based practitioners (astrology, tarot, numerology, Vastu, etc.) to manage clients, appointments, and session notes.

Features

- JWT-based authentication (register/login)
- Client management with auto zodiac sign & gemstone detection from date of birth
- Appointment scheduling with type and status tracking
- Consultation notes (planetary positions, predictions, remedies, follow-ups)
- 📊 Dashboard with practice analytics (zodiac distribution, upcoming sessions, etc.)
- Branded PDF client report export
- CSV export of client list

Tech Stack

Layer	Technology
Frontend	React 19, Vite, React Router, Axios, react-hot-toast
Backend	Node.js, Express
Database	MongoDB (Mongoose)
Auth	JWT + bcrypt
PDF Export	jsPDF, html2canvas

Project Structure

```
├── server/           # Express API
│   ├── models/      # Mongoose schemas (User, Client, Appointment, Note)
│   ├── routes/       # auth, clients, appointments, notes, dashboard
│   └── middleware/   # JWT auth middleware
├── client/          # React (Vite) frontend
│   └── src/

```

Getting Started

Prerequisites

- Node.js (v18+)
- MongoDB instance (local or Atlas)

Backend Setup

```
cd server  
npm install
```

Create a `.env` file in `server/`:

```
MONGO_URI=your_mongodb_connection_string  
JWT_SECRET=your_jwt_secret  
PORT=5000  
FRONTEND_URL=http://localhost:5173
```

Run the server:

```
npm run dev      # development (nodemon)  
npm start        # production
```

Frontend Setup

```
cd client  
npm install
```

(Optional) Create a `.env` file in `client/`:

```
VITE_API_URL=http://localhost:5000/api
```

Run the frontend:

```
npm run dev
```

The app will be available at `http://localhost:5173`.

Deployment

- **Backend:** Deployed on Render
- **Frontend:** Deployed on Vercel
- CORS is configured to allow `localhost`, any `*.vercel.app` preview URL, and `FRONTEND_URL`.
